S-Corp Tax Savings Implementation Roadmap

How To Turn What You Just Learned Into A Clean, Working S-Corp Setup In The Next 7 Days

Most S-Corp owners do not lose money because they never heard the strategies.

They lose money because they implement things out of order, skip key setup steps, or rely on guesswork.

This roadmap is designed to help you do the right things in the right order.

You do not need to do everything perfectly.

You just need to build your S-Corp correctly, one step at a time.

What This Roadmap Does

- Shows you what to do first
- Helps you avoid common setup mistakes
- Turns ideas into real implementation
- Keeps you from skipping the steps that make the tax savings actually work

What This Roadmap Is Not

- Not advanced tax planning
- Not legal advice
- Not a replacement for personalized tax advice
- Not a list of random deductions

The goal is simple: stop guessing and start structuring your S-Corp correctly.

Why Order Matters

Most S-Corp strategies only work when the layers underneath them are already in place.

If your payroll is not running correctly, your salary is probably not set correctly.

If your salary is not set correctly, your reimbursements and retirement planning may also be off.

If your books are behind, even good strategies can become hard to support.

That is why this is a roadmap — not a menu.

This is the same structure professionals use when setting up and reviewing S-Corps.

> Do not skip ahead. The lowest broken step usually causes the biggest problem.

Start with Day 1 today. Don't overthink it — just begin.

The 7-Day S-Corp Implementation Plan

Day 1 — Check Your Foundation

- S-Corp election filed and confirmed
- Business bank account fully separate
- Payroll running correctly
- Bookkeeping current
- Prior filings and payroll deposits up to date

Day 2 — Confirm Your Salary Setup

Do not guess — this is the most important number in your entire S-Corp. Your salary should be based on:

- The work you actually do
- How much time you spend in each role
- Market-based compensation data

Day 3 — Review Salary vs Distribution

Make sure you are not:

- Underpaying salary and overusing distributions
- Using random percentages
- Relying on old numbers that were never reviewed

Use Your Salary Calculator Here

This is where the Reasonable Salary Calculator in your system becomes important. Use it to test your numbers and make sure your compensation makes sense.

Open the Reasonable Salary Calculator

Day 4 — Set Up Your Accountable Plan

Put the reimbursement system in place properly:

- Written accountable plan
- Reimbursement categories identified
- Tracking method ready
- Reimbursement cycle chosen

The 7-Day S-Corp Implementation Plan (continued)

Use Your Accountable Plan System Here

Follow the Accountable Plan Setup System included in your materials to complete this step properly.

Open the Accountable Plan Folder

Day 5 — Start Tracking Reimbursements

Track the most common areas first:

- Mileage
- Home office
- Phone and internet
- Other qualified out-of-pocket business expenses

Day 6 — Review Benefits and Next-Level Opportunities

Once salary is set correctly, review:

- Retirement contribution potential
- Health insurance setup
- Other benefits tied to payroll and salary

Day 7 — Build Your Monthly Maintenance Habit

Set a simple process for:

- Logging expenses
- Reviewing reimbursements
- Checking payroll
- Keeping documentation current

What To Do First If You're Behind

If your S-Corp is messy right now, do not try to fix everything at once.

Start with the lowest incomplete step.

If your books are behind:
Get bookkeeping current first.

If payroll is not set up correctly:
Fix payroll before trying to optimize taxes.

If your salary was never formally reviewed:
Start there before building anything else.

If you have no accountable plan:
Set it up after your salary is addressed.

If you already have "strategies" in place:
Go back and make sure the foundation underneath them is solid.

> A strategy built on a broken foundation is fragile.

The Most Common Out-of-Order Mistakes

Setting up advanced strategies before fixing salary

This creates weak documentation and can make tax savings harder to defend.

Using reimbursements as a substitute for salary

An accountable plan supports compensation. It does not replace it.

Trying to optimize retirement contributions before salary is calibrated

Retirement contribution capacity depends on W-2 wages.

Running an S-Corp with mixed personal and business finances

This weakens the structure and makes documentation harder.

Waiting until year-end to organize everything

This usually leads to missed deductions, weak records, and bad decisions.

> The right order saves money. The wrong order creates confusion.

Your Simple Implementation Checklist

Foundation

- ☐ S-Corp election confirmed
- ☐ Business and personal accounts fully separate
- ☐ Payroll running correctly
- ☐ Bookkeeping current
- ☐ Payroll filings and deposits up to date

Salary

- ☐ Salary reviewed using role, time, and market data
- ☐ Salary and distributions make sense together
- ☐ Compensation decision documented

Reimbursements

- ☐ Accountable plan in place
- ☐ Mileage tracking started
- ☐ Home office documented if applicable
- ☐ Reimbursement process established

Maintenance

- ☐ Monthly review habit created
- ☐ Documentation stored in one place
- ☐ Next steps identified clearly

What To Do Next

If you work through this roadmap in order, you will be ahead of most S-Corp owners.

You do not need a perfect system on day one.

You need a system that:

- Makes sense
- Is documented
- Can be maintained consistently

That is how S-Corp tax savings become real.

> **The biggest mistake isn't doing it wrong.**
> **The biggest mistake is never fully implementing it.**
